

A Beautiful Life Shouldn't Cost The Earth...

BATH HOUSE
sustainable bathing & skincare

Welcome to our sustainable solution for a cleaner future.

We have been making and retailing our products in the Lake District for over 25 years and we believe this experience has given us an understanding of our customers' lifestyles and needs of today.

This is why we offer sustainable fragrance and skincare using active ingredients which are natural and eco-certified, filled into plastic-free containers, made from either aluminium or pharmaceutical glass. Created to last a lifetime, these are designed to be refilled and reused, avoiding unnecessary waste going to landfill and into the oceans.

We want to help and encourage these small changes to the way we all live, which we believe can lead to improved health and wellbeing and a more sustainable future for our planet. Working together, to make a difference.

Available in our bestselling natural skincare and fragrance collections -

Bamboo & Jasmine / fresh • light • clean

Bergamot & Amber / citrus • aromatic • warm

Cedar & Lime / intense • zesty • woody

Fig & Nutmeg / woody • fruity • spicy

Patchouli & Black Pepper / warm • smokey • sensual

Our motivation is simple, we want to create clean, natural
skincare and fragrance we can enjoy using in our lives today,
without harming the environment of tomorrow.

GREEN
SMALL
BUSINESS
CERTIFIED

Artisan, natural & clean.

The way we make our products separates us from most skincare brands. As artisan makers, all our products are handmade in small batches ensuring consistent quality and freshness, so they can deliver the key benefits of natural ingredients effectively to your skin.

Our making rooms are located in the rural valley of Dentdale, surrounded by a natural and ancient landscape - a place that inspires us to create the fragrances and formulations we make.

Working with natural ingredients is a very specialist way of making skincare and requires considerable dedication, knowledge and experience, all of which we have gained at the Bath House over the past 25 years, with a team who are dedicated and skilled at what they do.

We take time, working closely with our chemist and with our suppliers, to carefully source and check the quality of the ingredients used in our formulations, choosing only those which are of high quality, eco-certified, sustainable and supplied from as close to home as possible.

We are not a manufacturer, we are artisan makers.

Our sustainable approach.

our products...

- Are all made at our making rooms in Cumbria, England.
- Use a minimum number of ingredients to deliver a maximum effect.
- Use a high percentage of natural ingredients between 85-100% (most around 98%) .
- Made with eco-certified ingredients, sustainable and traceable to source.
- Have formulations developed to require less heat and therefore less energy.
- Products are vegan-friendly, cruelty-free and we have never tested on animals.
- Have clear, honest and transparent information on the packaging that shows what is refillable, recyclable and what is not.
- Our new handmade soaps are free from palm oil.
- Contain natural exfoliants such as ground walnut shell and never use microbeads.
- Avoid using synthetic ingredients such parabens, sulphates, SLES, TEA, SLS, DEA, MEA, petroleum, mineral oils, silicones or artificial colours in our formulations.

our packaging...

- Encourages customers to reuse, refill, and lastly recycle.
- Uses aluminium bottles, tubes and jars, because they can be endlessly recycled.
- Uses recyclable, British-made, strong pharmaceutical glass.
- Uses aluminium caps where possible, and encourages customers to reuse their plastic dispenser pumps.
- Provides a refillable system using plastic pouches (which use 85% less plastic than conventional plastic bottles).
- We have a partnership with Terracycle to recycle returned empty pouches.
- Since 2019 we have reduced our use of plastic containers by 95%.
- We are continuously seeking alternatives to plastic.
- Our packaging is designed to be as minimal as possible, only using outer boxes where necessary.
- We have designed boxes to clip together, avoiding the use of glue.
- Our printer uses a low energy printing press and an alcohol free print system and has BSI ISO14001 Environmental Management certification.
- Paper, board and card is FSC approved.
- We don't wrap our cologne boxes in plastic cellophane.

Working towards greater sustainability as a business requires determination and commitment, but we think what we are doing for the environment and for climate change is important, worthwhile and will help benefit everyone's future.

our practices...

- Our carbon usage is net zero, facilitated through a tree planting scheme.
- Our delivery packing methods include non-plastic tape and recyclable packing, to protect products.
- We bail and recycle all our excess cardboard.
- We use local suppliers, printers and services for sourcing materials from as close to home as possible.
- All our deliveries are made with zero carbon couriers.
- Bath House has opted into paying staff the Real Living Wage.
- We employ local people from our rural community, encouraging where possible to walk to work and homeworking, reducing their carbon footprint.
- We have a staff allotment growing vegetables.
- We are continuing to actively improve our infrastructure with regards to sustainability such as opting for energy saving light bulbs, using recycled office paper, recycling our cardboard outers and waste glass and are currently undertaking an internal audit of this area of the business to seek improvement.
- We donated thousands of hand sanitisers to NHS COVID wards, hospitals, local surgeries and healthcare centres and key workers during the pandemic. This has also given us an opportunity to use up our stock of plastic bottles.

Hands

Enriched with active natural extracts to help soothe, protect and nourish hands daily.

Hand Washes*

Effective and gentle cleansing and nourishment for the hands.

Bamboo & Jasmine / ABA30*
Patchouli & Black Pepper / APB30*

Join the journey today.

It's not about being perfect, it's about trying to do our best, and making small changes. Choosing our refill options can become a new habit that lasts forever, personally and as a community - together we can make a difference.

Our plastic pouches create 85% less waste than an average plastic bottle. We offer the Terracycle scheme which ensures that empty pouches are processed and repurposed to make useful items such as playground equipment. It's an easy way for you and your customers to join with us and reduce the use of single-use plastic waste every day in the bathroom, in the home and in the community.

Refills are currently available in -

Body Lotions

Hair & Body Washes

Hand Washes
