

BATH HOUSE

Hospitality Collection

NATURAL | VEGAN | REFILLABLE

MADE IN CUMBRIA, ENGLAND

It's time for change.

No to plastic. No to single use.

Made to last a lifetime.

/ Welcome

Sustainability for the hospitality sector.

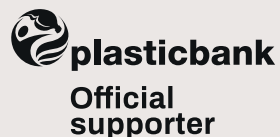

Bath House is an independent artisan maker of natural skincare, specialising in fragrance and natural beauty for over twenty seven years. We have a consistent and loyal following of customers who regularly visit our six shops in the Lake District and the North of England.

We have our own in-house formulator and work closely with our suppliers to ensure the products we make use natural, sustainable, eco-certified ingredients. We have never tested on animals and never will. We are approved under the Leaping Bunny programme, the best global cruelty-free assurance.

We are certified as a Green Small Business and offer a specialist, sustainable collection created for the hotel and hospitality sector. We are also an official supporter of Plastic Bank®, meaning we have supported the collection of 1000 kilograms of plastic bottles, playing in our part in preventing 50,000 plastic bottles from entering the ocean.

Our main objective is to reduce unnecessary plastic waste by filling into reusable aluminium bottles, creating products that are beneficial for the skin, using natural, eco-certified ingredients.

We want to work with like-minded businesses who share our vision and are prepared to make important changes now, which will lead to a more sustainable future, helping to reduce the effects of climate change across the world.

/ Our Vision

A beautiful life
shouldn't cost the earth.

Plastic waste isn't
someone else's problem,
it's everyone's.

/ Our Values

Honesty

We are transparent about where our ingredients and components come from, how we make our products and how they are to be refilled, reused and recycled.

By continuously helping each other we can do great things.

Educate

We share with people our vision for improving the environment, providing information about lifestyle changes everyone can make to help with climate change across the world.

People & Places

We invest in the future, cultivating positive long-term relationships with the people and stakeholders we work with.

/ Strategy

We approach
sustainability
in four ways :

Sustainable Ingredients

We use up to 98% natural ingredients in our products that are eco-certified, free from parabens, sulphates, petroleum, mineral oils, SLES, TEA, SLS, DEA, MEA and artificial colours. Our products are vegan and certified cruelty-free under the Leaping Bunny programme..

Waste Reduction

We have reduced overall packaging by creating products in reusable, aluminium bottles, eliminating single-use plastic, significantly reducing unnecessary waste.

Ethical Supply Chain

The provenance of our supply chain is key, from the traceable ingredients we use in our formulations to the FSC paper we print on. We create our products ourselves in our making rooms in Cumbria in small batches, ensuring quality is perfect every time.

/ The Method

Reuse + Refill

We support our customers by offering a 'reuse and refill' process, with our recyclable, 2.5 litre plastic pouches.

Each refill pouch fills the 300ml Bath House aluminium bottle 8 times.

The 300ml Bottle

Aluminium can be endlessly recycled, with 75% of all the aluminium used is still in use today.

Bamboo & Jasmine / Handcare

Essential cleansing and moisturising products with active natural ingredients keep hands feeling soft and rehydrated. Infused with a fresh green scent of bamboo and white jasmine flowers.

*This lotion is absolutely gorgeous,
it makes your hands so beautifully soft.*

*- Customer Review
/ Hand Lotion*

*This is a beautiful product in every way:
the quality of the wash, the gentle
elegant fragrance and also the bottle.*
